

Offer for barcode system alone

(((eTicket Barcode is ideal for transport providers and transport authorities that intend to sell (((eTickets online (e.g. via smartphones) using just VDV barcode. (((eTicket Barcode covers all of the basic services of VDV eTicket Service GmbH & Co. KG (VDV-ETS) that are required technically. There is no need to book (((eTicket Barcode if you are booking FULL (((eTicket directly.

Advantages at a glance

(((eTicket Barcode provides transport companies and transport authorities with the following services for running (((eTicket Deutschland in their organisations exclusively using the VDV Barcode:

- VDV KA release package (including VDV KA specifications and XML schemas)
- Allocation of an OrgID (security level 2 for test operations, level 3 for live operations)
- Use of (((eTicket Deutschland's security management program during the test phase and during live operations
- Access to the central services ZVM and KOSE via ION
- Use of VDV Barcode

ASM-Tool

ASM tool (asmtool.eticket-deutschland.de) is used to manage key application and security management processes for (((eTicket Deutschland. They include (((eTicket Deutschland registration processes and security component ordering functions.

A few steps is all it takes

The ASM tool makes ordering (((eTicket Barcode easy:

1. If you haven't already, register yourself and your company in the ASM tool. You can add new users using the ASM tool.
2. Order (((eTicket Barcode in the ASM Tool.
3. Your company will receive a level 2 and level 3 OrgID, which is used to identify your company in all agreements and processes.
4. Sign the general agreement for manufacturers and the membership agreement with T-Systems. Then you will receive an OTP token from T-Systems for the online authentication process.

When the process is complete, you and your company can order all the necessary security components (SAMs, keys, certificates, user media) for your eTicket system and use of the systems provided.

The only fees that must be paid for (((eTicket Barcode are the security management fees.

This offer is intended exclusively for transport companies and transport authorities that want to use (((eTicket Barcode from only.
